# Sterling Teapot and Coffee Set

## Sherry's Story (eBay ID shertoys)

I was on my way to work on a Friday morning in July, I left early to stop at a couple of garage sales before work.

Well this particular sale was not even advertised. As I approached this old farm house, I thought by the looks that maybe I should turn around and RUN! But I continued to the garage only to be greeted by a sweet little old lady.

She was very friendly and said I was the first customer. As I looked around nothing caught my eye. Then out of the house came her husband carrying this silver set. It was really tarnished and dirty.

I looked at one of the pieces and could barely read it, but I did make out the words Sterling & Towle. I was very excited about the sterling, but

knew nothing of the Towle word.

I immediately asked how much? The little lady said, "Oh, its not in very good shape, how about \$10.00?" I could have passed out.

I asked her if that was for each piece. She said, "No, the whole set." I could not pay fast enough and then I did almost run to my car.

I could not wait to get home from work that evening to research my great find. After researching I knew I had some special pieces. It took approximately three hours of cleaning, but was well worth it. All the pieces were beautiful with no dents & hardly any scratches. This is my most successful eBay story.
